Subject: CONTRACT N68711-89-C-A023, CONSTRUCT LANDING FORCE
TRAINING COMMAND (LFTC) BERTHING PIER (C7-88) AT THE
NAVAL AMPHIBIOUS BASE, CORONADO, SAN DIEGO, CA

Gentlemen:

Your performance on the above referenced contract has been evaluated by the Resident Officer in Charge of Construction, Coronado. The evaluation rates your performance in five areas consisting of quality of work, timely performance, effectiveness of management, compliance with labor standards and compliance with safety standards.

The highly effective management of Mr. Dale Winterquist and Mr. Chris Poma of your organization were demonstrated by submittals and resolutions of potential problems. The submittals required by the contract were submitted in a timely manner and were found to be well organized, accurate and job specific. Their conscientious attention to details was responsible for alerting the ROICC of dimensional errors on the drawings. The timely detection of the drawing errors and discrepancies prevented the need to modify the new aluminum brow unit by nearly three feet, which prevented delays and minimized costs. You are commended on the high quality of workmanship exhibited by the completed project during the final inspection. The project has also received favorable comments from the Naval Amphibious Base Staff Civil Engineer and Landing Forces Training Command regarding both quality of the work and the ahead of schedule completion. Test results and observations conducted by the government confirm that your workmen performed the work in a safe and conscientious manner. The performance rating for Falcon General Engineering for the above referenced project in each area and overall is outstanding.

It has been a pleasure working with a professional organization like Falcon General Engineering. The quality of your work, integrity, and timeliness of your organization do not go unnoticed and are greatly appreciated by the Navy.

Sincerely,

STEVEN R. MILLER
Commander, CEC, U.S. Navy
Resident Officer
in Charge of Construction
